WORK EXPERIENCE

Fifth AI Solutions

Remote

AI/ML Engineer

June 2025 – Present

- Delivered **OFUESI.org** (ofuesi.org) — a full-stack platform for a student evangelism organization with **PayPal** payments and automated email communications via **REST APIs**; launched at a half-yearly conference.
- Built **Fifth AI Academy** — a revamp of the internal Nexus platform — with student registration, **role-based access control**, course management, and automated offer letter generation using **Supabase** backend and edge functions.
- Led end-to-end application migration for **The Gospel Fellowship Austin** — migrated the client's platform across **Lovable, GitHub, and Supabase** from internal to client-owned infrastructure, ensuring continuity of data and functionality.
- Developed AI-assisted full-stack web applications using **Lovable and Base44** with **Supabase** backend, edge functions, and **React/TypeScript** frontend.

Tezo (Technovert Solutions)

Hyderabad, India

Software Developer & Team Lead

May 2019 – July 2023

- Promoted to **Team Lead** overseeing 5 developers — facilitated two-week **Scrum** sprints via **Azure DevOps**, managed backlog, sprint planning, and stakeholder reporting; improved delivery rate from **~50% to ~75%**.
- Built enterprise applications for **20+ clients across 11 solutions** using **SharePoint SPFX, JavaScript, Power Automate**, and **Azure** — reduced **bug resolution by 20%** and **CI/CD release turnaround by 25%**.
- Collaborated with QA on release sign-offs via **Azure Pipelines (YAML)**; delivered technical status updates to business stakeholders.

EDUCATION

University of Texas at Dallas

Richardson, TX

MS, Business Analytics and Artificial Intelligence | 2023–2025

- Coursework: Database Management, Applied Machine Learning, Data Visualization, Business Analytics, Statistical Modeling | **Top 5 Finalist — DATAWHIZ Hackathon** (Kimberly-Clark dataset, presented to industry executives)

CVR College of Engineering

Hyderabad, India

BS, Computer Science and Engineering | 2015–2019

PORTFOLIO PROJECTS

CSV to PostgreSQL Ingest Pipeline (Python, PostgreSQL, Docker, psycopg2, pytest) 2026

- Engineered a production-grade **Python ETL pipeline** that extracts CSV data, applies **idempotent upsert logic** to load into **PostgreSQL**, handling both new inserts and updates on every run.
- Containerized with **Docker Compose** with health checks and persistent volumes; **structured logging**, **pytest** unit tests, and **PEP 8** standards throughout.

CERTIFICATIONS

- [Microsoft Certified Python Programming Fundamentals](#)

Coursera Nov 2025

LEADERSHIP / ORGANIZATIONAL EXPERIENCE

Vice President — International Christian Fellowship (UTD)

Mar 2024 – Apr 2025

- Led student leaders, organized **workshops, outreach events, and community programs**; represented the club in university meetings — strengthened **leadership, event coordination, and team collaboration** skills.

TECHNICAL SKILLS

Full Stack & Backend: React, TypeScript, JavaScript, Supabase, Edge Functions, REST APIs, PostgreSQL, SQL, Python

AI-Assisted Development: Lovable, Base44, AI-assisted vibe coding, prompt engineering for development

Data & Analytics: Python, Pandas, NumPy, Scikit-learn, ETL/ELT Pipelines, Data Preprocessing, psycopg2

DevOps & Workflow: Azure DevOps, Azure CI/CD (YAML), Docker, Git/GitHub, Agile/Scrum, SharePoint SPFX, Power Automate

Familiar With: Tableau, Power BI, TensorFlow, PyTorch, cloud platforms (Azure, AWS basics)

ADDITIONAL INFORMATION

Work Authorization: Post-Completion OPT (valid through July 2026) with STEM OPT extension eligibility — no sponsorship required during this period

Languages: English, Hindi, Telugu
